Risk Assessment Policy 2025

Revised Date:	19-06-2025
Next Review:	18-06-2026

Introduction

The School is required by the Management of Health & Safety at Work Regulations to carry out risk assessments for all activities. The School will continue to assess all activities and establish written risk assessments for those areas which indicate the presence of risk.

Assessments

Assessments will continue to be carried out using the School's Risk Assessment form, by those persons having control and immediate responsibility for the activity. The person organising the activity will keep a record of the assessment and ensure that all staff and students involved are aware of the requirements of the assessment. A copy of each assessment will be retained in a central file.

RISK ASSESSMENT PROCEDURE

1. Introduction

The concept of risk assessment is not new, what is new is the emphasis on risk assessment in the management of Health & Safety. The Management of Health & Safety at Work Regulations 1999 specifically requires all business employing 5 or more people to conduct risk assessments and to record their main findings.

2. Definitions

- a. Hazard is the potential to cause harm that is inherent in an article, substance or activity.
- b. Risk is the likelihood that the hazard will cause harm in the actual circumstances of use.

3. Legislation

Risk assessments have been implicit under the Health & Safety at Work Act 1974 and explicit under regulations such as the Control of Substances Hazardous to Health (COSHH) Regulations and the Noise at Work Regulations made under this Act.

The Management of Health & Safety at Work Regulations requires a risk assessment to be carried out by employers to assess the risk to staff, students and others who may be affected by their undertaking, and to record the significant findings of the assessment and any group of employees as being especially at risk. Where an assessment is made under other regulations such as the COSHH Regulations this will

meet the requirements of the assessment required by the Management of Health & Safety at Work Regulations.

4. Requirements of Risk Assessments

Risk assessments should identify the significant risks arising out of work or an activity. The level of detail in a risk assessment should be broadly proportionate to the risk, with the risk assessment undertaking the following:

- Ensuring that all relevant risks or hazards are addressed
- Addressing what actually happens during activities
- Ensuring that all groups of employees and others who might be affected are considered
- Identifying groups of workers who might be particularly at risk e.g. young or inexperienced workers and disabled staff
- Taking account of existing preventative or precautionary measures

5. Undertaking Risk Assessments

- The potential hazard is identified and on determining the persons affected and the risk control measures, the Risk Level may be determined as Low, Medium or High using the following criteria:

Risk Level

Low – Superficial wounds or temporary ill health

Medium – More serious wounds and ill health lending to permanent minor disability

High – Fatality, life threatening wounds and life shortening diseases

- Having assessed the risk level and the control measures in place, the potential severity is assessed.
- the necessary action/ control required must be undertaken to lower the level of risk.
- Work should not be started or continued until the risk level has been reduced
- Where the risk is medium to high, the action required to reduce the risk must be identified

A written risk assessment is required for medium and high risk activities.

6. Recording Risk Assessments

Having undertaken a risk assessment, unless the risk is trivial or low, it should be recorded on a school Risk Assessment Form.

- The risk assessment should be signed and dated by the person completing the form.
- The findings of the risk assessment should be made known to all staff and students affected by the activity assessed.
- A copy of all completed risk assessments should be kept within the relevant department or service area and their location made known to all staff within that area.

7. Reviewing/Updating Risk Assessments

All risk assessments should indicate on them the required review period that should be:

- at least annually
- at regular periods dependent of the level of risk of the activity
- immediately following an accident
- when new activities are introduced
- The review should be signed and dated by the person completing the form.

Jamia Islamia Birmingham - Risk Assessment

A. GENERAL ACTIVITIES	
1	General Manual Handling
2	Use of Portable Electrical Equipment
3	Moving Transporting Computers/Equipment on Trolleys
4	Disposal of Clinical/ Medical Waste
5	Use of Word Processors, Pc's, Printers
6	Work Alone

B. CURRICULUM BASED ACTIVITIES	
1	Art and Design
2	Science – Chemistry, Biology, Physics
3	Physical Education (Indoor and Outdoor)
4	Information Technology
5	Educational Visits
6	Manual Handling of PE Equipment

C. SITE MANAGEMENT AND CLEANING	
1	Use of Cleaning Materials
2	Use of Vacuum Cleaners
3	Working at Heights
4	Outside Play Areas

D. SITE AND BUILDING ISSUES	
1	Site Cleanliness
2	Drinking Water Supply
3	Showers and Changing Rooms
4	Movement of Students
5	School Events
6	Contractors Working on Site
7	Fire Prevention

Jamia Islamia School - Risk Assessment

Potential Hazard	Risk	Who Might be harmed	Risk Control Measures	Current Risk Level	Further Actions/Controls	New Risk Level
General Manual Handling	<ul style="list-style-type: none"> • Back strain • Cuts, Bruises • Sprains, joints, muscles 	Staff Pupils Visitors	<ul style="list-style-type: none"> • Complete a manual handling assessment • Break down loads where possible • Carry out tasks at quite times • Request assistance for heavy loads - long distance • Avoid rushing • Maintain floors free from slips/trips hazards • Report any manual handling related injuries , near misses 	High	<ul style="list-style-type: none"> • Complete a manual handling risk assessment for all tasks • Refer to manual handling policy 	Low
Use of Portable Electrical Equipment	<ul style="list-style-type: none"> • Cuts • Bruises • Electrical Shock • Electric burns • Serious Injury 	Staff Pupils Visitors	<ul style="list-style-type: none"> • Ensure adequate levels of supervision, instruction and training are in place • All staff and students to follow manufacturers instructions • Staff to undertake visual checks of equipment prior to each use • Testing by a competent person 	Medium	<ul style="list-style-type: none"> • Any damaged/ defective equipment should be taken out of use and labelled unsafe • All repair including fitting of plugs to be undertaken by competent persons • Position equipment correctly consider location of sockets and prevent trailing wires • Equipment to be used by authorised personnel only 	Low
